Hi {First Name},

Wanted to follow up on my last note in case it got buried.

One thing I've seen consistently with SaaS teams at your stage: the bigger the rep count, the harder it gets to keep sequence

We built something specifically to solve that · a sequence intelligence layer that surfaces what's actually working and pushes

[Similar Company A]'s team saw a 22% lift in reply rates within 60 days of rollout.

Happy to share the full breakdown if you'd like · 20 minutes, no pitch deck.

Worth a look?

Hi {First Name},

I'll keep this short · I've reached out a couple of times and haven't heard back, so I'm guessing the timing isn't right or this is

Either way, I'll stop following up after this. If sequence consistency or outbound efficiency ever becomes a focus, I'd love to

Hi {First Name},

I work with a handful of Fintech people teams who recently moved off [Competitor] · the common thread was always the same

If that resonates at all, it might be worth a conversation. We've helped similar-sized Fintech teams cut onboarding cycle time

Not pitching · genuinely curious if those pain points are live for your team. Is a 15-minute call this week feasible?

Hi {First Name},

Following up with something I thought might be useful rather than just another check-in.

We published a short internal case study last month on how [Reference Customer] · a Fintech firm similar in size to [Company]

Happy to send it over if it's relevant to what you're managing right now. No form to fill out · just a reply saying 'yes' works.

Hi {First Name},

Congrats on the Series B · that's a significant milestone.

One thing we see consistently with engineering teams at this stage: cloud spend starts compounding faster than headcount.

We help post-Series-B engineering orgs right-size their infrastructure spend without touching the core architecture · average

Would it be useful to run a free 2-week cost audit against your current cloud setup? No access to production required.

Body:

Hi {First Name},

Quick follow-up. When we run our initial audit on post-Series-B engineering stacks, the number that surprises most CTOs is

At your current scale, that's likely a meaningful monthly line item.

We built a passive read-only scanner that flags exactly where this is happening without any code changes or prod access. T

Want me to send you the setup guide so you can run it yourself?
